arterferro is a brand of

GONZATO
GROUP

The best in wrought iron

Il meglio del ferro battuto

Arteferro is a division of Gonzato Group dedicated to the production of semifinished elements in wrought iron, brass and bronze. The Arteferro product line includes over 32,000 semi-finished ornamental items made of wrought iron, brass, and bronze: pierced bars, forged pickets, pre-assembled panels, leaves, flowers, baskets, roses, scrolls, rings, and other decorative elements, as well as a rich variety of home furnishings. It is the task of blacksmiths to assemble them into finished objects such as railings, fences, or any other creation suggests his creativity. Arteferro also includes the Arteferro System product line, which is characterized by an elegant and innovative style.

A small, but massive revolution!

The Compendium catalogue has been specifically organised to facilitate the search for individual items. First of all, the structural elements, like long bars, pierced bars and overthrows, then filling elements, like pickets, panels and rosaces, and then passing onto decorative elements like scrolls, circles, spheres and many others. At the end, you'll find the accessories and tools for construction site activities.

Arteferro è la divisione di Gonzato Group dedicata alla produzione di elementi semilavorati in ferro battuto, ottone e bronzo. La gamma di prodotti Arteferro comprende oltre 32.000 elementi: barre forate, paletti forgiati, pannelli preassemblati, foglie, fiori, pigne, rosoni, ricci, cerchi ed altri componenti decorativi, oltre ad una ricca serie di complementi d'arredo. Sarà compito del fabbro assemblarli in oggetti finiti come parapetti, recinzioni o qualsiasi altra creazione gli suggerisca la sua creatività. Arteferro comprende anche la linea di prodotti Arteferro System, caratterizzata da uno stile elegante ed innovativo.

Una piccola grande rivoluzione!

Il catalogo Compendium è stato organizzato appositamente per agevolare la ricerca di ogni elemento. Prima gli elementi strutturali, come le barre lunghe, le barre forate e le cimase, poi gli elementi di tamponamento, come i paletti, i pannelli, rosoni, per passare agli elementi decorativi come i ricci, i cerchi, le sfere e molti altri. Infine si troveranno gli accessori e gli utensili per l'attività di cantiere.

Guida catalogo

New products

Our designers are always at work! In Arteferro Quick, you'll find many **new articles highlighted** with a specific seal. With a classic or modern design, they're always characterized by the unique and unmistakable Arteferro style.

Nuovi prodotti

I nostri designer sono sempre all'opera! In Arteferro Quick troverai tanti **nuovi articoli evidenziati** dall'apposito bollino. Dal design classico o moderno sono comunque sempre caratterizzati dallo stile Arteferro, unico ed inconfondibile.

Easy to flip through

At the beginning of each section, on the focused cover, a description helps understand its content. Thanks to the renewed graphics it will be very easy to find the item you are looking for. In the more complex sections easy instructions will help you to better understand how they are organised.

Facile da sfogliare

All'inizio di ogni capitolo, sulla copertina dedicata, un testo descrittivo aiuta a capire cosa troverai all'interno. Grazie alla grafica rinnovata sarà un gioco da ragazzi individuare l'articolo che ti interessa. Nei capitoli più complessi abbiamo riportato delle facili istruzioni che ti aiuteranno nel comprendere la logica dell'organizzazione.

Amongst the pages, a huge amount of useful information

Created afresh, based on over forty years of experience in the industry, Compendium wants to become a really easy to use and intuitive work tool for you to consult, by virtue of its new logical layout, which enables you to find the product of interest straight away, to pass quickly from one family of articles to another, and then to go into the details with sizes and finishes.

Tra le pagine molte informazioni utili

Realizzato ex novo, sulla base di un'esperienza ultra quarantennale nel settore, Compendium vuole diventare un vero e proprio strumento di lavoro facile ed intuitivo da consultare, in virtù della nuova ragionata impaginazione che consente di trovare immediatamente il prodotto di interesse, passando celermente tra le famiglie di articoli, per poi entrare nel dettaglio con il dimensionamento e le finiture.

4.	Classical pickets and Panels Paletti e Pannelli classici		A lot of pickets and panels have been classified to make it easier for you to find what you want quickly and easily. Starting with the central motif, you can find your article by process as well as matching decorations.
A	Forged pickets	Paletti forgiati	pag. 72
B	Hammered pickets	Paletti conati	pag. 88
C	Tube pickets	Paletti in tubo	pag. 92
D	Pickets with twisting	Paletti con torciglione	pag. 94
E	Pickets with big twisting	Paletti con torciglione grande	pag. 100
F	Pickets with baskets	Paletti con pigna	pag. 102
G	"S" shaped panels	Pannelli ad "sesta"	pag. 105
H	Panels with scrolls	Pannelli con ricci	pag. 110

GONZATO

GROUP

A company looking towards the future

Since 1971, **Gonzato Group** is world leader in the production and sale of ornamental components for the building industry and architecture.

All our products are the result of careful and passionate research by qualified experts that know the field better than anyone else. In fact, it is thanks to the Group's work if the production of metal elements for architecture and constructions has been able to grow in terms of technology and project management to become what it is now. The experience acquired in over 40 years of work in the field of wrought iron allowed us to develop in the last 15 years the same deep knowledge in the field of stainless steel and of its fencing applications.

As a matter of fact, our **IAM Design** line, while being more technical and stylized compared to the **Arteferro** components, meets the same needs of safety, support and decoration that we have always well known. In the Group's catalogues you will find more than 30,000 fencing and furniture components always ready to use and ready to be dispatched. Thanks to our long experience, that involves all the production and supply chain from product design to manufacturing, to the installation support, we are the sole company in the world who is able to realize and install anywhere big fencing structures, relying upon our know how and the practical sense of our designers and members of our team.

Un'azienda rivolta al futuro

Gonzato Group è da 50 anni leader mondiale nella produzione e commercializzazione di semilavorati ornamentali per l'edilizia e l'architettura. Tutti i nostri prodotti sono frutto di studi attenti ed appassionati da parte di professionisti specializzati che conoscono il settore meglio di chiunque altro. Infatti è grazie alla attività del Gruppo se la produzione di elementi metallici per l'architettura e l'edilizia ha potuto svilupparsi tecnologicamente e progettualmente fino a diventare quel che è ora. L'esperienza maturata in oltre 40 anni di ferro battuto, ha consentito negli ultimi 15 anni di sviluppare un altrettanto approfondita conoscenza dell'acciaio inox e dei suoi utilizzi nella recinzione.

IAM Design, infatti, propone soluzioni più tecniche e stilizzate, mentre i manufatti in ferro battuto di **Arteferro** hanno caratteristiche di maggiore varietà ornamentale, ma entrambe le linee di prodotti assolvono sempre a quelle stesse esigenze di protezione, sostegno e decorazione che ben conosciamo da sempre. Nei cataloghi del Gruppo sono presenti oltre 30.000 manufatti per recinzioni ed arredamento, sempre pronti all'uso ed alla consegna. Grazie a questa esperienza pluridecennale che coinvolge tutta la filiera dalla produzione siderurgica, al design dei prodotti, alla loro realizzazione, all'installazione dei manufatti, siamo anche gli unici al mondo capaci di ideare con architetti e sviluppatori oltre che di realizzare ovunque grandi opere, forti del know how e della praticità dei nostri progettisti e operatori.

Our turnkey service

Gonzato Group also deals with special turnkey supplies, in wrought iron, stainless steel, or any other metal; for prestigious private homes, public buildings, community spaces and for each kind of commission that requires a custom-made approach all, from the planning to installation. Assisting the customer during all the process, from the first steps to the finished work, Gonzato Group is the ideal partner for any project, placing itself towards the client like the sole responsible of the quality of its product and its service.

I nostri servizi “chiavi in mano”

Gonzato Group si occupa anche di forniture speciali chiavi in mano, in ferro battuto, in acciaio inox o in qualsiasi altro metallo, per prestigiose proprietà private, edifici pubblici, alberghi, spazi comunitari e per ogni tipo di commissione che richieda un approccio custom made, dalla progettazione all'installazione. Affiancando il committente durante tutto il percorso, dai primi passi fino al lavoro finito, Gonzato Group è partner ideale per ogni progetto e si pone nei confronti del cliente come unica responsabile della qualità del proprio prodotto e del servizio offerto.

Production from “i” to “i”

From the i of Idea to the i of Installation, we take care of every aspect of the product.

Unlike many of our competitors, we are real producers thanks to our 5 production branches in Italy and Europe. Unlike most of the products on the market, our items are realized in our production branches in Italy and Europe, thus being submitted to production rules and standard quality tests that allow us to know the story of each piece from its birth to its delivery.

Produzione dalla “i” alla “i”

Dalla “i” di ideazione alla “i” di installazione, ci occupiamo di ogni aspetto del prodotto.

A differenza di molti altri noi siamo davvero produttori con 5 stabilimenti produttivi in Italia ed Europa. Siamo l'unica azienda del settore che può vantare una capacità produttiva in grado di soddisfare ogni richiesta speciale entro brevi tempi di produzione.

I nostri articoli, rispetto alla gran parte dei prodotti che si trovano sul mercato, sono realizzati nei nostri centri produttivi in Italia ed Europa, sottostando a canoni di produzione e a test qualitativi standard, che ci consentono di conoscere la vita di ogni manufatto dalla sua nascita alla sua consegna.

Guaranteed, certified and patented quality

Our articles are produced in our production centers in Italy and in Europe. We can manage the entire production chain ensuring the best final quality. This quality has long been recognized by the certifications obtained ISO 9001 and ISO 14011. A further added value, always as guarantee of originality and quality, it is represented by the patents obtained for many of our items, with the aim to protect both the inventiveness of our designer and the trust of our customers.

Qualità garantita, certificata e brevettata

I nostri articoli vengono realizzati nei nostri centri produttivi in Italia e in Europa. Possiamo quindi gestire tutta la catena di produzione garantendo così la migliore qualità finale. Tale qualità è da anni riconosciuta anche dalle certificazioni ottenute ISO 9001 e ISO 14011. Un ulteriore valore aggiunto, sempre a garanzia di originalità e qualità, è rappresentato dai brevetti registrati per molti dei nostri articoli, con lo scopo di tutelare sia l'ingegno dei nostri designer sia la fiducia dei nostri clienti.

An excellence customer service

Our back-office staff is fluent in five languages and is on hand to give you all the information and support you need.

Un servizio clienti d'eccellenza

Il nostro staff di back office parla fluentemente cinque lingue diverse ed è a vostra disposizione per darvi tutte le informazioni ed il supporto che vi servono.

A marketing department at your disposal

Our marketing department is on hand to organize activities and to develop promotional materials personalized with the customer's logo. For years now we make flyers and catalogs tailored to our customers.

Un ufficio marketing a tua disposizione

Il nostro ufficio marketing è a disposizione per organizzare attività ed elaborare materiale promozionale personalizzato con il logo del cliente. Da anni ormai realizziamo volantini e cataloghi ad hoc per i nostri clienti più affezionati.

Educational

With our specialized staff, we organize meetings of technical training: all you need to know to design and install parapets, railings, stairs and other structural elements in accordance with law.

Formazione

Con il nostro personale specializzato, organizziamo incontri di formazione tecnica: tutto ciò che bisogna sapere per progettare ed installare parapetti, cancellate, scale ed altri elementi strutturali a norma di legge.

Arteferro products in the catalogue can be produced in brass, aluminum or steel. Also custom-made.

I prodotti Arteferro presenti a catalogo possono essere prodotti in ottone, alluminio o acciaio. Anche su misura

Long bars

Barre lunghe

Arteferro long bars are variously shaped metal bars, used for a multitude of applications: along a staircase or wall where a support is needed, or as a structural part of a gate or fence. Using both hot and cold processes, they are available in lengths of 3 and 6 metres, with square, rectangular or round sections. To complete the section, there's a wide range of fittings, joints and clamps for tightening of decorative elements.

Le barre lunghe Arteferro sono barre di metallo ariamente sagomate, si usano in una moltitudine di applicazioni: lungo una scala od una parete in cui sia necessario un appoggio, come parte strutturale di un cancello o di una recinzione. Con lavorazioni sia a caldo che a freddo sono disponibili nelle lunghezze da 3 e 6 metri, con sezioni quadre, rettangolari o tonde. A completare il capitolo, la vasta gamma di partenze, giunzioni e fascette per il serraggio di elementi decorativi.

Items
GD124/33, 34
and 35 were used
to create
the new features
of the Colosseum in Rome.

Gli articoli GD124/33, 34
e 35 sono stati utilizzati
per la realizzazione
delle nuove cancellate
del Colosseo a Roma.

Arteferro
products
can be manufactured
as well as customised.

I prodotti Arteferro
sono realizzabili
anche su misura.

The end piece of a handrail is a highly characterising element. Don't allow the processing and beauty of your handrail get spoiled by an unsightly welding between the end and the long bar. The extendable ends resolve this problem: starting with 3 meters rails, we can create the end you need.

La partenza di un corrimano è un elemento altamente caratterizzante. Non lasciare che la lavorazione e la bellezza del tuo corrimano venga interrotta da una antiestetica saldatura tra la partenza e la barra lunga. Le partenze allungate risolvono questo problema: partendo da una barra di 3 metri realizzeremo la partenza che ti serve.

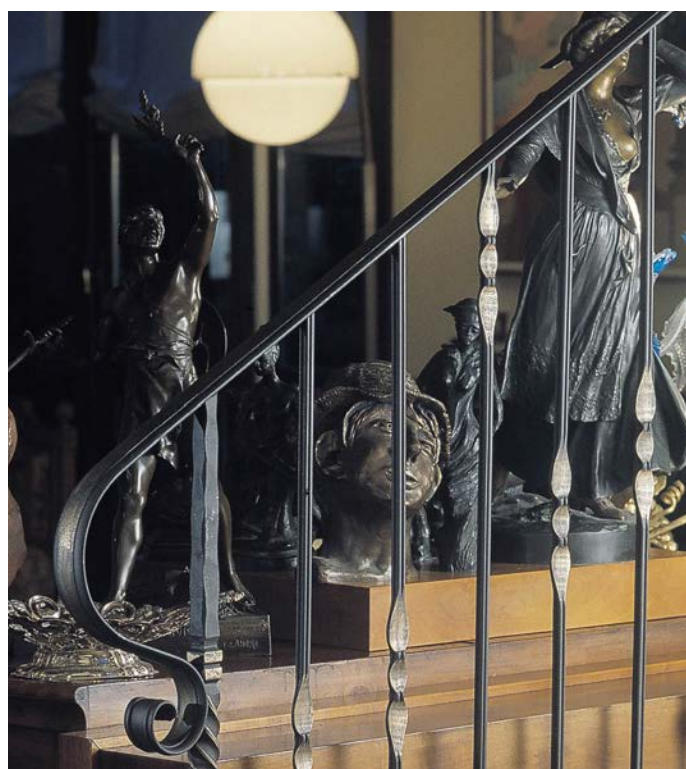

Add "/XL" at the end of the code for your end piece to order extra-long. You'll achieve an excellent result, without any visible welds.

Aggiungi "/XL" alla fine del codice della tua partenza per ordinare la versione extra lunga. Otterrai un risultato eccellente, senza saldature.

Example - Esempio

Hot hammered - Coniato a caldo

Variable length depending on which end you select
Lunghezza variabile in base alla partenza scelta

Add "/XL" at the end of the code for your end piece to order extra-long. You'll achieve an excellent result, without any visible welds.

Aggiungi "/XL" alla fine del codice della tua partenza per ordinare la versione extra lunga. Otterrai un risultato eccellente, senza saldature.

Example - Esempio

116/11/XL = Extended version
= Versione allungata

Pierced bars Shaped bars *Barre forate* *Barre sagomate*

Arteferro pierced and shaped bars are items with of a wrought iron symbol. Beyond a protective function, they confer a touch of elegance that embellishes the buildings into which they are installed. Arteferro pierced bars are available in lengths up to 3 metres, with diverse machining and drilling. The opening can have either a circular, oval, square or rectangular section which can be made on the side or on the corner, in order to satisfy any aesthetic requirement.

Le barre forate e barre sagomate Arteferro sono degli elementi simbolo del ferro battuto. Al di là della funzione protettiva, conferiscono un tocco di eleganza che impreziosisce l'edificio in cui sono installate. Le barre forate Arteferro sono disponibili con lunghezze fino a 3 metri, con diverse lavorazioni e forature. L'apertura può avere sezione circolare, ovale, quadrata o rettangolare e può essere effettuata sia sul lato sia sullo spigolo, in modo da soddisfare ogni esigenza estetica.

Select the section first, then the type of hole and technical details (section, hole size, pitch, distance, no. of holes) At this point, identifying the finish will be easy.

Scegli prima la sezione e poi il tipo di foro e i dettagli tecnici (sezione, dimensione foro, interasse, luce, n. fori) A questo punto, individuare la finitura sarà un gioco da ragazzi.

Choose the pierced bar, add "/SAB" at the end of the code to order the sandblasted version or add "/Z" to order the galvanized version

Scegli la barra forata, aggiungi "/SAB" alla fine del codice per ordinare la versione sabbata o aggiungi "/Z" per ordinare la versione zincata a freddo

Example - Esempio

1360/6/SAB = sandblasted version = versione sabbata

1360/6/Z = galvanized version = versione zincata a freddo

Overthrows

Cimase

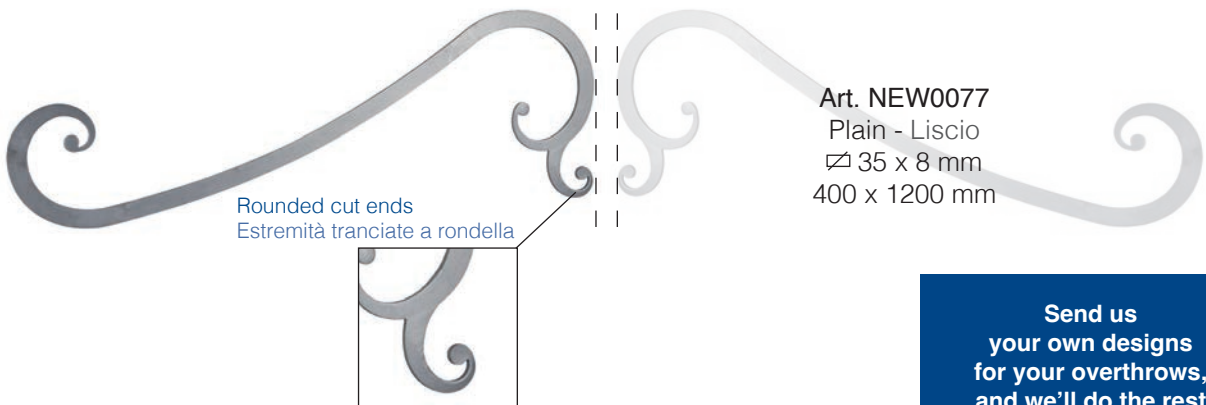

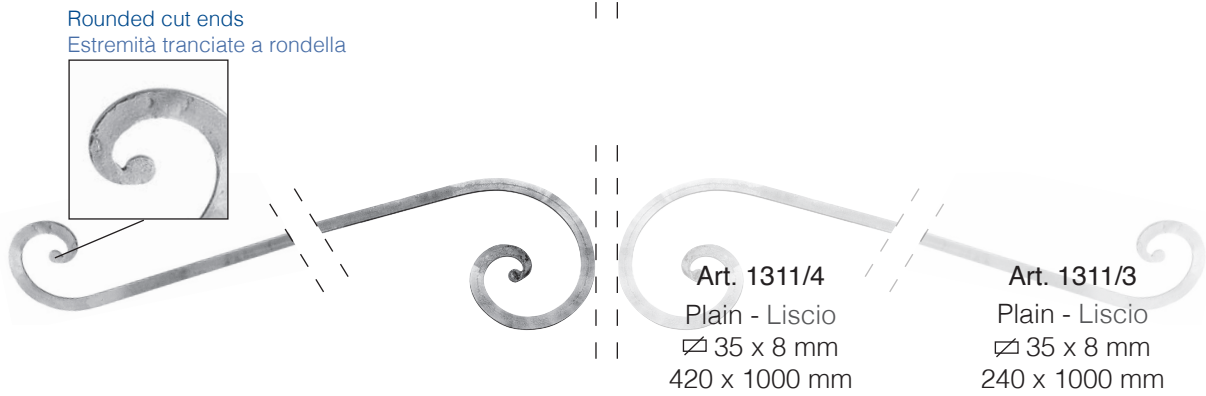

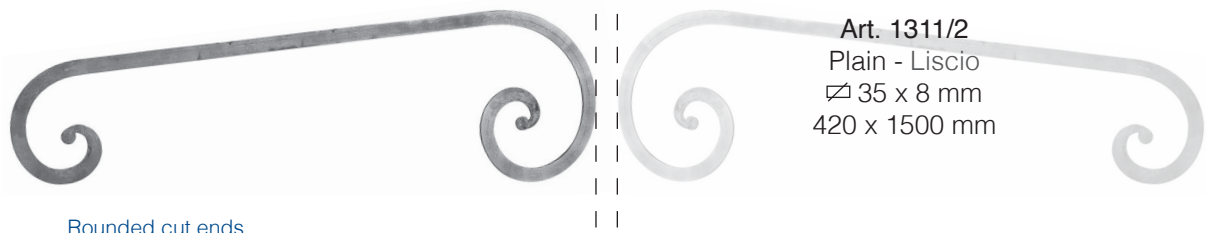

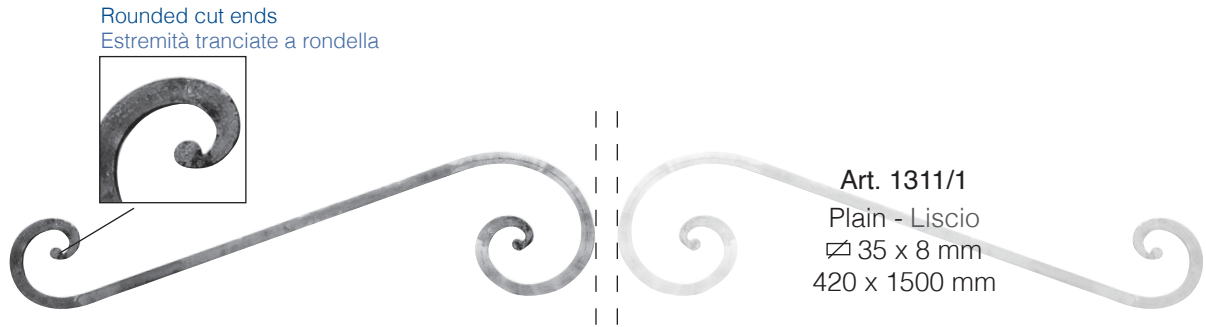

Arteferro overthrow are decorative elements that can be used as the crowning points of a fence, a gate, a door or a window. From the simplest to the most elaborate, every Arteferro overthrow is ready for installation and is an ideal solution for combining fast installation and aesthetic results.

Le cimase Arteferro sono elementi decorativi che possono fare da coronamento per una recinzione, un cancello, un portone o una finestra. Dalla più semplice alla più elaborata, ogni cimasa Arteferro è pronta per l'installazione e rappresenta la soluzione ideale per combinare rapidità di posa e risultato estetico.

Classical Pickets and Panels

Paletti e Pannelli classici

Arteferro pickets and panels are amongst the most important items in the composition of an infill of a balustrade or fence. The classic design means you can create structures with a refined taste and an unmistakable and timeless style, typical of traditional wrought iron items.

I paletti e pannelli Arteferro sono tra gli elementi più importanti nella composizione del tamponamento di un parapetto o di una recinzione. Il design classico consente di realizzare strutture dal gusto ricercato e dallo stile inconfondibile ed intramontabile, tipico dei manufatti in ferro battuto tradizionali.

Modern Pickets and Panels

Paletti e Pannelli moderni

Arteferro pickets and panels are amongst the most important items in the composition of an infill of a balustrade or fence. The modern design of these new lines of items reinterprets in a contemporary way, the elegance and refinement of traditional materials like wrought iron.

I paletti e pannelli Arteferro sono tra gli elementi più importanti nella composizione del tamponamento di un parapetto o di una recinzione. Il design moderno di queste nuove linee di elementi reinterpreta in chiave contemporanea l'eleganza e la raffinatezza di un materiale tradizionale come il ferro battuto.

Bowed pickets

Pancioni

Arteferro bowed pickets are elegant elements that allow you to create railings, fences or curved balustrated. Also made with patterns that reflect those of the pickets and panels, they can therefore be combined with each other to create compositions of refined elegance.

I pancioni Arteferro sono degli eleganti elementi che consentono di creare inferriate, recinzioni o parapetti bombati. Realizzati anche con motivi che riprendono quelli dei paletti e dei pannelli, possono quindi essere abbinati tra loro per realizzare composizioni dalla ricercata eleganza.

Pickets for fencing *Paletti per recinzione*

Arteferro pickets are a convenient solution for building a fence. Made with different sections, round or square, they are available in an infinite number of processes and finishes, and can be embellished with other items, like baskets, studs, scrolls, leaves or knots. Just block them with horizontal supporting elements and you're done.

I paletti per recinzione Arteferro rappresentano una comoda soluzione per la composizione di una recinzione. Realizzati con diverse sezioni, tonde o quadrate, sono disponibili in un'infinità di lavorazioni e finiture e possono essere abbelliti con altri elementi quali pigne, borchie, ricci, foglie o nodi. Basterà bloccarli con degli elementi orizzontali a sostegno ed il gioco è fatto.

Spear points are electrowelded to the picket: electrical energy is used to obtain the union between metal parts, the junction between the components is precise and clean.

Le lance sono elettrosaldate ai paletti: sfruttando l'energia elettrica, per ottenere l'unione tra parti metalliche, la giunzione tra i componenti risulta precisa e pulita.

Spear point and Post tops *Lance, Pomoli e Terminali a colonna*

Arteferro spear points and tops reveal the nature of the buildings they protect. A historic symbol of protection for the most prestigious dwellings, you can embellish the pickets, posts and the columns of your fence. Designed to be positioned at the ends of the iron columns, these items reinforce and strengthen any wrought iron artefact.

Le lance ed i pomoli Arteferro rivelano la natura dell'edificio che proteggono. Simbolo storico di protezione delle dimore più prestigiose abbelliscono i paletti, i caposaldi e le colonne della tua recinzione. Ideati per essere posti alle estremità delle colonne in ferro, questi elementi conferiscono slancio e vigore ad ogni manufatto in ferro battuto.

Rosaces *Rosoni*

Arteferro rosaces are particularly elaborate decorative elements that can be used to embellish external and internal environments like gates and grilles, balustrades, stairs, walls and skylights too.

I rosoni Arteferro sono elementi decorativi particolarmente elaborati che possono essere impiegato per abbellire ambienti esterni ed interni come cancelli ed inferriate ma anche parapetti, scale, pareti e lucernari.

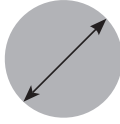

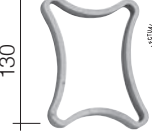

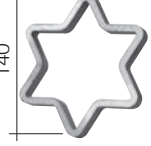

arteferro

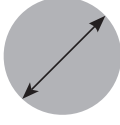

The rosaces have been listed by diameter: after identifying this dimension, it is enough to choose the section and then the art type

I rosoni sono stati catalogati per diametro: identificata tale dimensione, basterà scegliere la sezione e quindi la tipologia artistica.

Scrolls and Snap-ons *Ricci e Snap-ons*

Arteferro scrolls and snap-ons have been designed to embellish even the simplest wrought iron composition. Like the other Arteferro decorative elements, they can be used in many different projects, from gates to the railings, as well as on stairways and balconies. Even a fence or a balustrade with vertical posts made of plain iron can be embellished at a later time by these useful decorative items.

I ricci e gli snap-ons Arteferro sono stati ideati per impreziosire anche la più semplice composizione in ferro battuto. Come gli altri elementi decorativi Arteferro, trovano applicazione in molteplici realizzazioni, dalla cancellate alle inferriate, così come nelle scale e nelle balconate. Anche una recinzione o un parapetto in paletti verticali di ferro liscio può essere arricchita in un secondo momento con l'utilizzo di questi utili elementi decorativi.

10.A Scrolls pag.278

Ricci

10.B Snap-ons pag.306

This section will give you an overview of Arterferro scrolls. The main characteristic element of a scroll is the end. We have organised the items upon this, in accordance with their style or the manufacturing used. Once you've chosen the end, you can find your scroll.

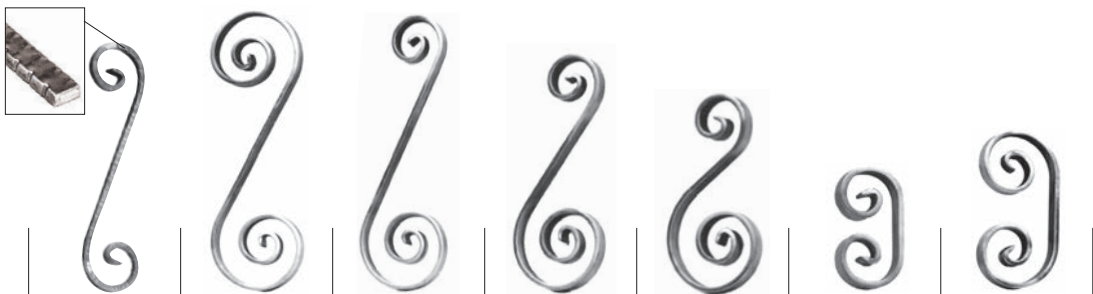

Questo capitolo vi darà una panoramica dei ricci Arterferro. Principale elemento caratterizzante di un riccio è il terminale.

Su questo abbiamo organizzato gli articoli, in base allo stile o alla lavorazione. Scelto il terminale, trovi il tuo riccio.

Rings

Cerchi

Arteferro circles, with their simple, discreet shape, are items that can complete any wrought iron composition. Since they can be used as decorations and joints, they even help to support items of great structural complexity. They are available with various types of section: rounded, half rounded, square with hot pressed ends and various types of finishes.

I cerchi Arteferro, con la loro forma semplice e discreta, sono elementi in grado di completare qualsiasi composizione in ferro battuto. Utilizzabili come decoro e congiunzione, aiutano a sostenere i manufatti anche di grande complessità strutturale. Sono disponibili in varie sezioni: tondo, mezzo tondo, quadre con estremità stampate a caldo e lavorazioni di vario tipo.

Spheres

Sfere

Arteferro produces spheres with different finishes: plain, faceted, forged and hollow. The spheres are often combined with other wrought iron items, making it possible to create high quality decorative articles: they can be used as terminals for pickets or posts, as spacers, or as compositional elements for creating different organic shapes, like bunches of grapes.

Arteferro produce sfere con diverse finiture: lisce, diamantate, spicchiate e vuote. Le sfere vengono spesso abbinare ad altri elementi in ferro battuto, permettendo di realizzare manufatti decorativi di elevato pregio: possono essere utilizzate come terminali per paletti o caposaldi, come distanziali o come elementi compositivi per la realizzazione di diverse forme organiche come i grappoli d'uva.

Bushes

Borchie

Arteferro bushes are compositional elements that are often used for the construction of wrought iron fences, railings, gates and balconies. Available in a range of versions, stamped, lathed, forged or tubular; with or without through holes, they can be fitted to pickets or posts and serve as a decorative element.

Le borchie Arteferro sono elementi compositivi spesso utilizzati per la realizzazione di recinzioni, inferriate, cancelli e balconate in ferro battuto. Disponibili in varie versioni, stampate, tornite, forgiate o in tubolare; con o senza foro passante, possono essere assemblate ai paletti o ai piantoni e fungono da elemento decorativo.

Baskets

Pigne

Arteferro baskets are central decorations, and are installed by welding the ends to the pickets they are inserted into. Their ornamental function confers an artistic dynamism to any structural element they are applied to, creating an elegant and sinuous wrought iron artefact.

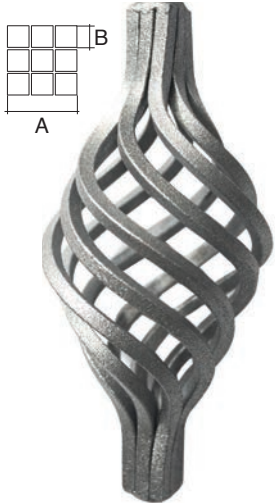

Le pigne Arteferro sono decori centrali e vengono installate saldandone le estremità al paletto nel quale vengono inserite. La loro funzione ornamentale conferisce dinamicità artistica all'elemento strutturale al quale vien applicata, creando un manufatto in ferro battuto elegante e sinuoso.

Flowers and Rosettes

Fiori e Rosette

The flowers and ornaments made by Arteferro are mainly characterised by floral motifs, threadlike ribs and metallic decorations inspired by nature. They find an application in various contexts and can embellish and enhance the structure they seem to be growing from.

I fiori e gli ornamenti realizzati da Arteferro sono principalmente caratterizzati da motivi floreali, nervature filiformi e decorazioni metalliche si ispirano alla natura. Trovano applicazione in diversi contesti e sono in grado di arricchire e valorizzare il manufatto dal quale sembreranno sbocciare.

Decorations in steel sheet

Decorati in lamiera

Arteferro scrolls and snap-ons have been designed to embellish even the simplest wrought iron composition. Like the other Arteferro decorative elements, they can be used in many different projects, from gates to the railings, as well as on stairways and balconies. Even a fence or a balustrade with vertical posts made of plain iron can be embellished at a later time by these useful decorative items.

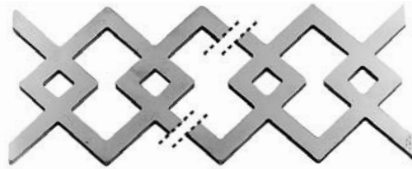

I ricci e gli snap-ons Arteferro sono stati ideati per impreziosire anche la più semplice composizione in ferro battuto. Come gli altri elementi decorativi Arteferro, trovano applicazione in molteplici realizzazioni, dalla cancellate alle inferriate, così come nelle scale e nelle balconate. Anche una recinzione o un parapetto in paletti verticali di ferro liscio può essere arricchita in un secondo momento con l'utilizzo di questi utili elementi decorativi.

Plates and Accessories

Piastre ed Accessori

Arteferro plates are decorative elements that can either be positioned at the base or alongside posts, and can be manufactured with a rounded or square shape, depending on the client's aesthetic requirements. Arteferro accessories are mainly complementary elements and have no structural function, such as: handles, knobs, hinges and locks.

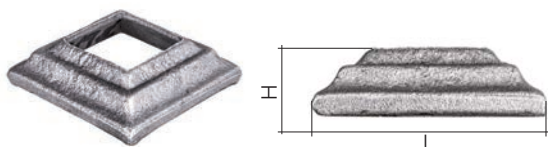

Le piastre Arteferro sono elementi decorativi poste o alla base o a lato dei montanti e possono essere realizzate di forma tonda o quadrata a seconda delle esigenze estetiche della committenza. Gli accessori Arteferro invece sono principalmente elementi di complemento e non hanno funzione strutturale, quali: maniglie, pomolini, cardini e serrature.

Arterferro supplies paints and patinas for finishing your wrought ironwork, both indoors and outdoors. They can be used to colour handrails, stairs, gates, bars, fences and other decorative elements in forged iron.

Arterferro mette a disposizione vernici e patine per rifinire al meglio le vostre realizzazioni in ferro battuto, sia in interni che in esterni. Possono essere utilizzate per la colorazione di corrimani, scale, cancelli, inferriate, recinzioni ed altri elementi decorativi in ferro forgiato.

Varnishes - Vernici

Arterferro **paints**, available either as transparent varnishes or coloured paints, provide a finishing and at the same time prevent the natural deterioration of metal caused by atmospheric agents. To obtain better and longer lasting results, we recommend you to "prepare" the iron using other Arterferro products such as nitro thinner or an iron brush.

Le **vernici** Arterferro, disponibili sia trasparenti che colorate, rifiniscono e al contempo prevengono il naturale deterioramento del metallo dovuto agli agenti atmosferici. Per ottenere risultati migliori e duraturi consigliamo di "preparare" il ferro utilizzando gli altri prodotti Arterferro come il diluente nitro o la spazzola per ferro.

Patinas - Patine

Arterferro **patinas** are special paints, very opaque and dense, which allow an elegant oxidation effect to be produced on the metal, thus giving the painted product a refined style with a thick decorative finish. Available in gold, copper, silver and green, they can be applied after painting as well as directly onto the iron.

Le **patine** Arterferro sono vernici particolari, molto coprenti e dense, che consentono di riprodurre un elegante effetto ossidazione sul metallo, conferendo così al prodotto verniciato uno stile ricercato di grande spessore decorativo. Disponibili in colore oro, rame, argento e verde possono essere applicate dopo la verniciatura ma anche direttamente sul ferro.

Alluminium

Alluminio

Arteferro has a wide range of aluminium elements in its production. It is a silver-colored ductile metal and its softness, lightness and resistance to oxidation is remarkable, due to the formation of a very thin layer of oxide that prevents oxygen from corroding the underlying metal.

Arteferro vanta tra la sua produzione una vasta serie di elementi in alluminio. Si tratta di un metallo duttile color argento ed è notevole la sua morbidezza, la sua leggerezza e la sua resistenza all'ossidazione, dovuta alla formazione di un sottilissimo strato di ossido che impedisce all'ossigeno di corrodere il metallo sottostante.

Galvanized *Zincati*

Arteferro also adds galvanised products to its wide range. Cold galvanising is considered a technique similar to painting, so it is applied as a normal primer paint with antioxidant power linked to the galvanic action of zinc, due to the effect of electrolysis. This treatment is carried out at a temperature of approximately 20-25 °C, distinguishing itself from the hot one in which it is worked at 450 °C. For this reason it is particularly suitable for thin sheets, thus avoiding deformation of the material.

Arteferro aggiunge nella sua vasta gamma anche i prodotti zincati. La zincatura a freddo è considerata una tecnica assimilabile alla verniciatura per cui viene applicata come una normale vernice di fondo con potere antiossidante legato all'azione galvanica dello zinco, per effetto dell'elettrolisi. Questo trattamento viene effettuato ad una temperatura di circa 20-25 °C, distinguendosi da quella a caldo nella quale si lavora a 450 °C. Per questo motivo è particolarmente indicato per lamiere sottili, evitando così la deformazione del materiale.

Brass

Ottone

Arteferro offers a wide range of brass accessories in particular to decorate parts of gates, stairs or fences. Brass offers the perception of a "warm" furnishing decoration. Today, design wants to reward a backfire of this element that has been in fashion for most of the 20th century.

Arteferro propone un'ampia gamma di accessori in ottone in particolare per decorare parti di cancelli, scale o recinzioni. L'ottone offre la percezione di una decorazione d'arredo "calda". Oggi il design ha voluto premiare un "ritorno di fiamma" di questo elemento che è andato di moda per buona parte del '900

ARTEFERRO LABORATORY

In its factory, Arteferro created a tests area, where all output is thoroughly tested. You can see below some of the tests we regularly perform. Our products have always been manufactured in order to reach the highest standards in quality and safety because we want to be sure that our systems are up to their function. To verify compliance with the specific functional and performance requirements, we carry in our test area a set of tests, measurements, investigations and inspections. Our products are qualitatively tested before, during and after production by qualified experts. Even more so, for 15 years we relied upon several certification authorities to certify our products, submitting them to several tests apt to determine in an objective way their performance. The design and production quality of Arteferro item allowed us to obtain certifications according to the standards currently in force in many European countries and to ensure the choice of our customers. Follow some test that we make every day.

Arteferro ha realizzato nei propri stabilimenti un'area appositamente dedicata ai test dei vari sistemi al fine collaudare rigorosamente tutta la produzione. Pertanto i nostri prodotti sono da sempre progettati e realizzati per offrire il massimo livello qualitativo e di sicurezza perché vogliamo essere certi che siano all'altezza della funzione che andranno a svolgere. Per verificare la rispondenza agli specifici requisiti funzionali e prestazionali, effettuiamo nella nostra Test Area un insieme di prove, misurazioni, accertamenti ed ispezioni. I nostri prodotti sono anche testati qualitativamente prima, durante e dopo la produzione da personale esperto e specializzato. Da ormai 15 anni ci affidiamo a più enti di certificazione che sottopongono i nostri prodotti a diverse prove atte a determinare, in modo oggettivo, le loro prestazioni. La qualità progettuale e produttiva degli elementi Arteferro ci ha permesso di ottenere certificazioni secondo le normative attualmente vigenti in molti paesi europei e di garantire così la scelta della nostra clientela. Di seguito, alcune delle prove che si effettuano regolarmente.

SOME OF THE TESTS CARRIED OUT – ALCUNI DEI TEST EFFETTUATI

STATIC TESTS PRE- AND POST-BREAKAGE
THESE TESTS ARE PERFORMED ACCORDING TO STRICT SAFETY STANDARDS, DEFINING THE CRITERIA AND STATIC, CONCENTRATED AND DISTRIBUTED LOADS, PRE- AND POST-BREAKAGE, OF RAILINGS, BALUSTRADES AND PREFABRICATED RAILINGS.

PROVE STATICHE PRE E POST ROTTURA
QUESTI TEST VENGONO ESEGUITI SECONDO RIGIDI STANDARD DI SICUREZZA, I QUALI DEFINISCONO I CRITERI ED I CARICHI STATICI, CONCENTRATI E DISTRIBUITI, PRE E POST ROTTURA, DI RINGHIERE, BALAUSTRATE E PARAPETTI PREFABBRICATI.

DYNAMIC TESTS
THESE TESTS ARE PERFORMED BY STRIKING SPECIFIC POINTS OF THE RAILING SYSTEMS WITH A MOVING OBJECT. THE ULTIMATE PURPOSE IS TO ASCERTAIN THE LEVEL OF SAFETY, EVEN IN CASE OF SUDDEN IMPACTS.

PROVE DINAMICHE
QUESTI TEST VENGONO ESEGUITI FACENDO IMPATTARE UN CORPO IN MOVIMENTO IN UN PUNTO SPECIFICO DEL SISTEMA PARAPETTO. IL FINE ULTIMO È QUELLO DI ACCERTARE IL LIVELLO DI SICUREZZA ANCHE IN CASO DI IMPATTI IMPROVVISI.

Our engineers are always up to date about the main european and international regulations
I nostri ingegneri sono sempre aggiornati in merito alle principali normative europee e internazionali

MATERIALS AND FINISHING

MATERIALI E FINITURE

AISI304

AISI 304 STAINLESS STEEL - SATIN FINISH

AISI 304 is a stainless steel austenitic alloy composed by a Cr content between 18% and 20% and a Ni content between 8% and 11%. It is the most utilized stainless steel in the world, and represents more than 50% of the total consumption. The ideal steel for indoor installation.

ACCIAIO AISI 304 - SATINATO

L'AISI 304 è una lega di acciaio inox austenitica composta da un tenore di Cr tra il 18% ed il 20% e di Ni tra l'8% e l'11%. È il tipo di acciaio inossidabile più utilizzato al mondo e costituisce più del 50% del consumo totale di inox. L'acciaio ideale per installazioni in interni.

AISI316

AISI 316 STAINLESS STEEL - SATIN FINISH

AISI 316 is a stainless steel austenitic alloy composed by a Cr content between 16% and 18%, a Ni content between 11% and 14% and a Mo content between 2% and 3%. Molybdenum percentage guarantees a better corrosion resistance, therefore it is the ideal material for outdoor installation.

In case of strong external environments, AISI316 mirror finish is recommended, because it proves to be really resistant in terms of atmospheric agents, pollution and seaside chlorides.

ACCIAIO AISI 316 - SATINATO

L'AISI 316 è una lega di acciaio inox austenitica composta da un tenore di Cr tra il 16% ed il 18%, di Ni tra l'11% e il 14% e di Mo tra il 2% ed il 3%. La percentuale di molibdeno assicura una migliore resistenza alla corrosione, pertanto è il materiale ideale per installazioni in esterni.

In caso di installazione in ambienti esterni aggressivi, si raccomanda la scelta di acciaio AISI 316 con finitura mirror in quanto particolarmente resistente agli agenti atmosferici, all'inquinamento e ai cloruri tipici delle località marittime.

AISI316
MIRROR

AISI 316 STAINLESS STEEL - MIRROR

Mirror finish is obtained mechanically thanks to specific abrasive brushes that polish the surface increasing corrosion resistance. Upon several tests effected with the collaboration of the main research institutes of research, Arterferro recommends the use of mirror polished products for application in saline environments (area within 12 km from the seaside) or in areas with high level of polluting agents (city centres/industrial areas).

ACCIAIO AISI 316 - LUCIDO

La finitura Mirror è ottenuta meccanicamente con l'utilizzo di speciali spazzole abrasive che lucidano la superficie degli elementi aumentandone la resistenza alla corrosione. Dopo numerose prove svolte in collaborazione con i principali istituti di ricerca, Arterferro consiglia l'utilizzo dei prodotti lucidati a specchio per applicazioni in ambiente salino (fino a 12 km dal mare) o ad alta concentrazione di agenti inquinanti (centro città/zone industriali).

IRON

GALVANIZED IRON

It is Fe360B galvanized iron. Unlike stainless steel, iron is cheaper but more subject to corrosion. To solve this problem, it is hot dip galvanized. Perfect for outdoor installations.

FERRO ZINCATO

Si tratta di ferro Fe360B zincato. Il ferro, rispetto all'acciaio inox, è più economico ma è anche molto più soggetto alla corrosione. Per ovviare a questa problematica viene zincato a caldo. E' una soluzione ideale per installazioni in esterni.

ALU

ALUMINIUM

The Aluminium used in Arterferro items is anodized and brushed. The chemical treatment called anodization is able to convert the material surface, making it more resistant and longer lasting in terms of oxidation. Brushing is a finish that gives the profile a specific scratching, as the one of the satin stainless steel. It is a cheap solution, suitable for both indoor and outdoor installations.

ALLUMINIO

L'alluminio utilizzato per gli elementi Arterferro è anodizzato e spazzolato. Il procedimento chimico chiamato anodizzazione è in grado di trasformare la parte superficiale del materiale trattato, rendendola più resistente e durevole nei confronti dei processi di ossidazione. La spazzolatura è una finitura che conferisce al profilato una speciale graffiatura, simile a quella dell'acciaio inox satinato. E' una soluzione economica, valida per installazioni sia in interni sia in esterni.

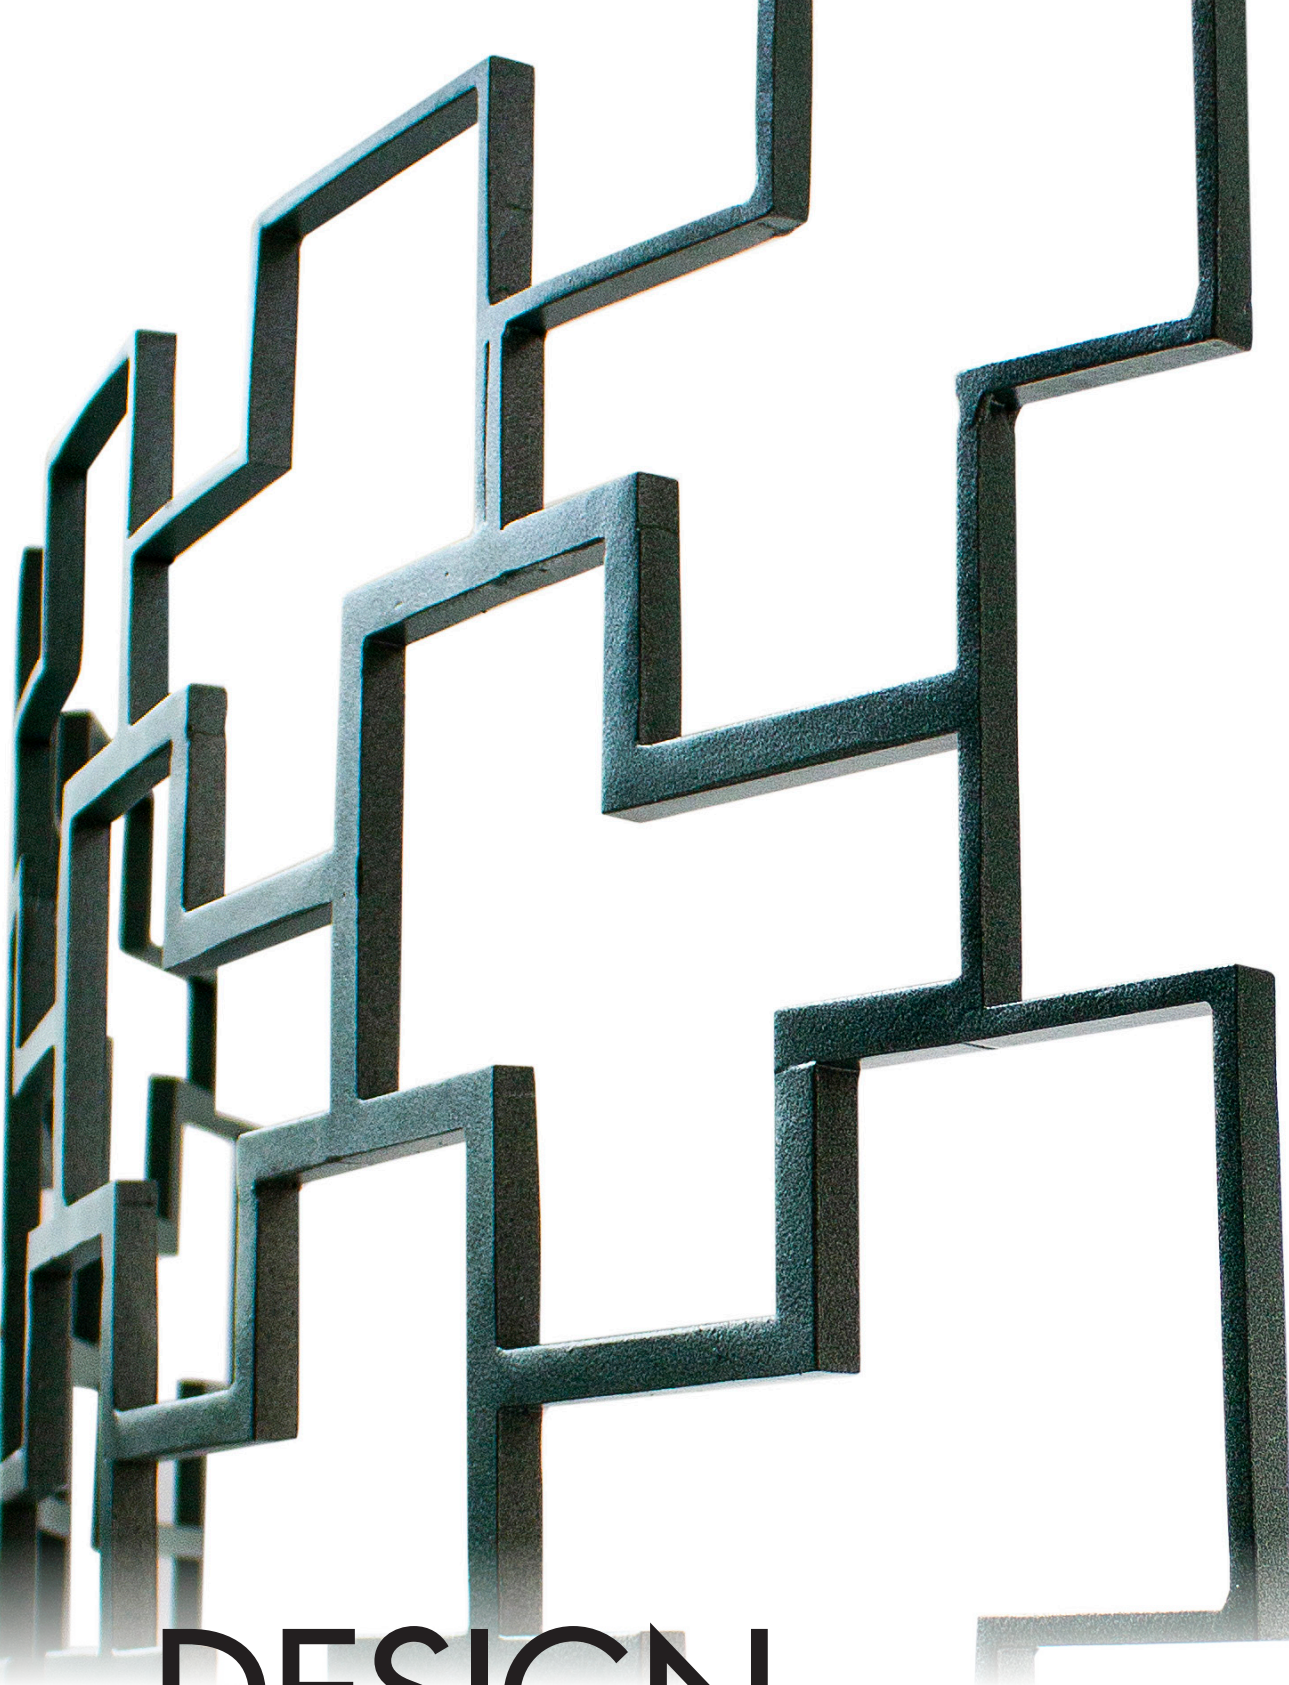

ECO-FRIENDLY - 100% RECYCLABLE

The Arterferro steel elements are 100% recyclable: they can be remelt to produce new objects.

ECO-FRIENDLY - 100% RICICLABILE

Gli elementi in acciaio Arterferro sono riciclabili al 100%: possono quindi essere rifusi per produrre nuovi oggetti.

DESIGN

Arteferro products are ideal for those who want a railing original and with unique design. To complete the work, just only your imagination is needed.

I prodotti Arteferro sono l'ideale per chi desidera un parapetto originale, e dal design unico. Per completare l'opera, basterà solo la tua fantasia.

info@arteferro.com

CULTURE PRODUCT

Arteferro deals with real experiences to enhance product culture and share it for the development of new project ideas. The themes of technological innovation, sustainability and aesthetic are the founding elements of the research set with universities and training events organized with architect studios and retailers worldwide. Arteferro works both with and for designers, so that their ideas are given free reign and their designs realized. The specification of the construction site is an opportunity for project design and culture of product to meet. This enables a reduction in time and cost of construction, which in turn creates excellent results.

CULTURA DI PRODOTTO

Arteferro si confronta quotidianamente con esperienze reali per fare cultura di prodotto e sviluppare nuove consapevoli idee progettuali. Le tematiche di innovazione tecnologica, sostenibilità e ricerca estetica sono alla base dello studio con le università e degli eventi di formazione organizzati con studi di architettura e rivenditori di tutto il mondo. Arteferro lavora sia con che per i designer, in modo che le loro idee diventino realtà nei progetti realizzati. Le peculiarità del cantiere sono un'opportunità di incontro tra design del progetto e cultura del prodotto. Ciò consente una riduzione dei tempi e dei costi di costruzione, che a sua volta crea ottimi risultati.

IDENTITY

From the studying of the product till the realization of the packaging Arteferro distinguishes itself for quality, professionalism and functionality.

Dallo studio del prodotto alla realizzazione dell'imballaggio, Arteferro si distingue per qualità, professionalità e funzionalità.

VERTICAL METALS

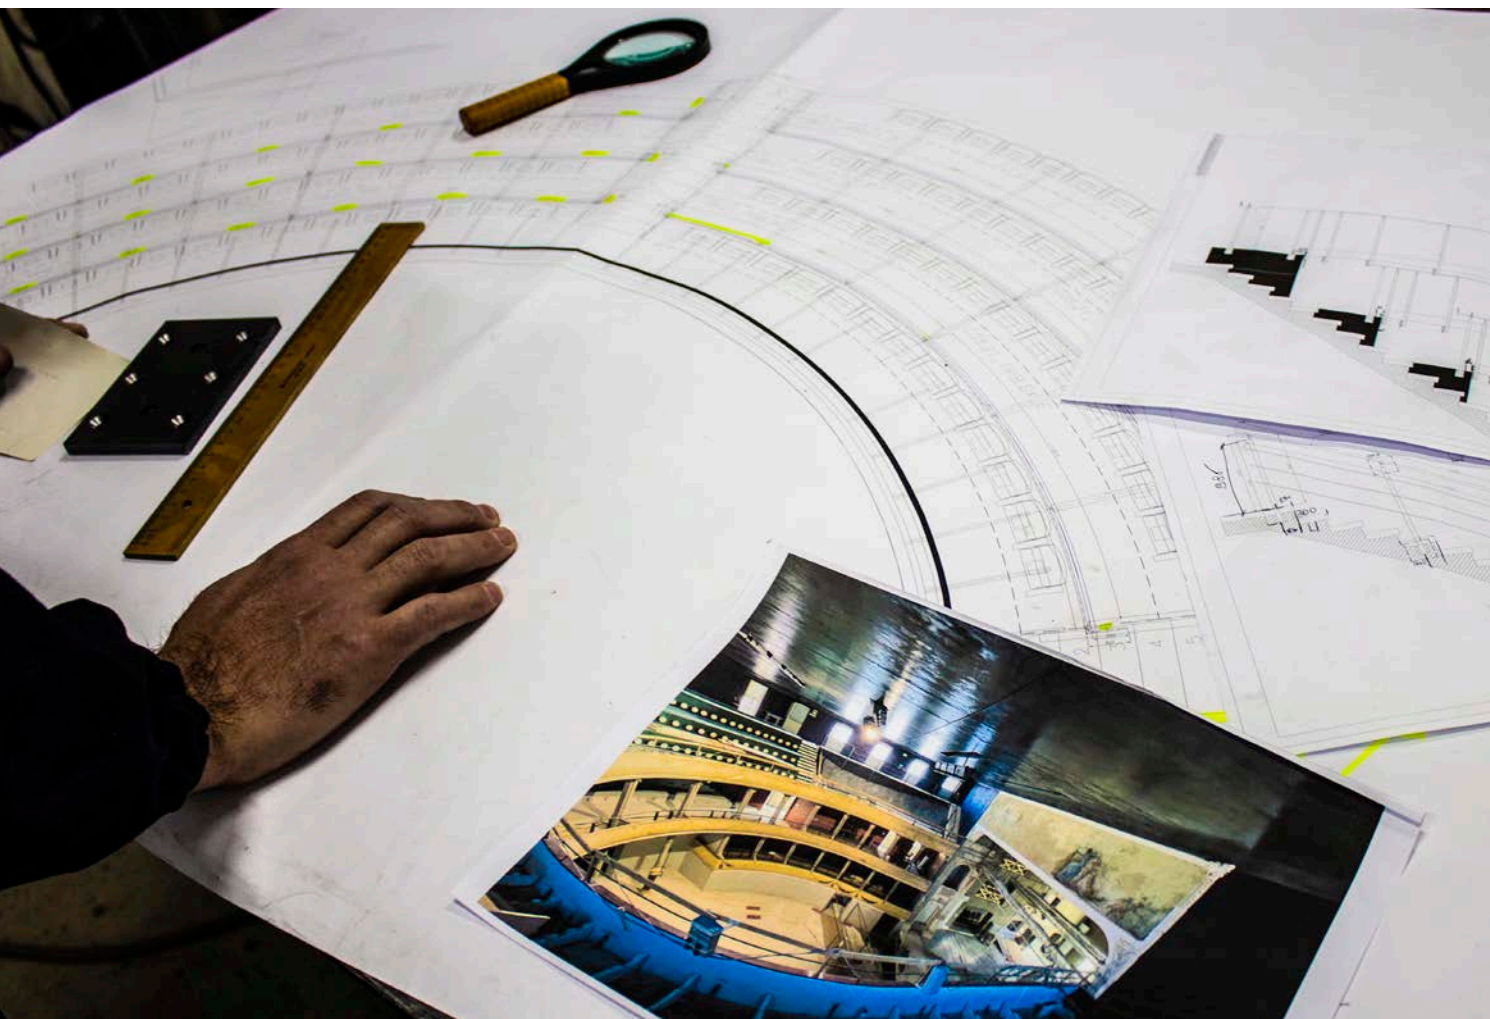

It's called Vertical Metals and is the new line for ornamental façades systems branded Arterferro. Patented design, green material, it can be a siding but also a stand-alone structure or a partial/total coverage. From the eras of Romanticism and Art Nouveau this is the first conceptual reworking of a classic material like wrought iron that, also maintaining the typical craftmade finishing, takes on a completely new design characterized by unusual tridimensionality.

Si chiama Vertical Metals ed è la nuova linea di sistemi per facciate ornamentali marchiate Arterferro. Design brevettato, materiale green, può essere un rivestimento ma anche una struttura a sé stante, a copertura parziale o totale. Dalle epoche del Romanticismo e dell'Art Nouveau è la prima rielaborazione concettuale dell'utilizzo di un materiale classico come il ferro battuto che, pur mantenendo la tipica finitura artigianale, assume un design completamente nuovo dalle insolite tridimensionalità.

RESEARCH AND DEVELOPMENT

In Arteferro the designers and engineers team daily works to design new products in harmony with current technical requirements so that they are easy to install and integrate with other architectural elements. Research is continuously ongoing, especially in terms of manufacturing and combinations, such as wood and glass, which characterize products even more and more and satisfy specific aesthetic requests.

RICERCA E SVILUPPO

In Arteferro un team di designer ed ingegneri lavora quotidianamente all'ideazione di nuovi prodotti che soddisfino sempre più la necessità di bellezza, in armonia con le esigenze tecniche oggi esistenti, che siano facili da installare e da integrare con gli altri elementi architettonici, adattandosi all'ambiente. Costante è la ricerca di lavorazioni ed abbinamenti con materiali diversi, come ad esempio il legno ed il vetro, che caratterizzano ancora di più i prodotti e che soddisfano così anche le richieste estetiche più particolari.

TECHNICAL SUPPORT

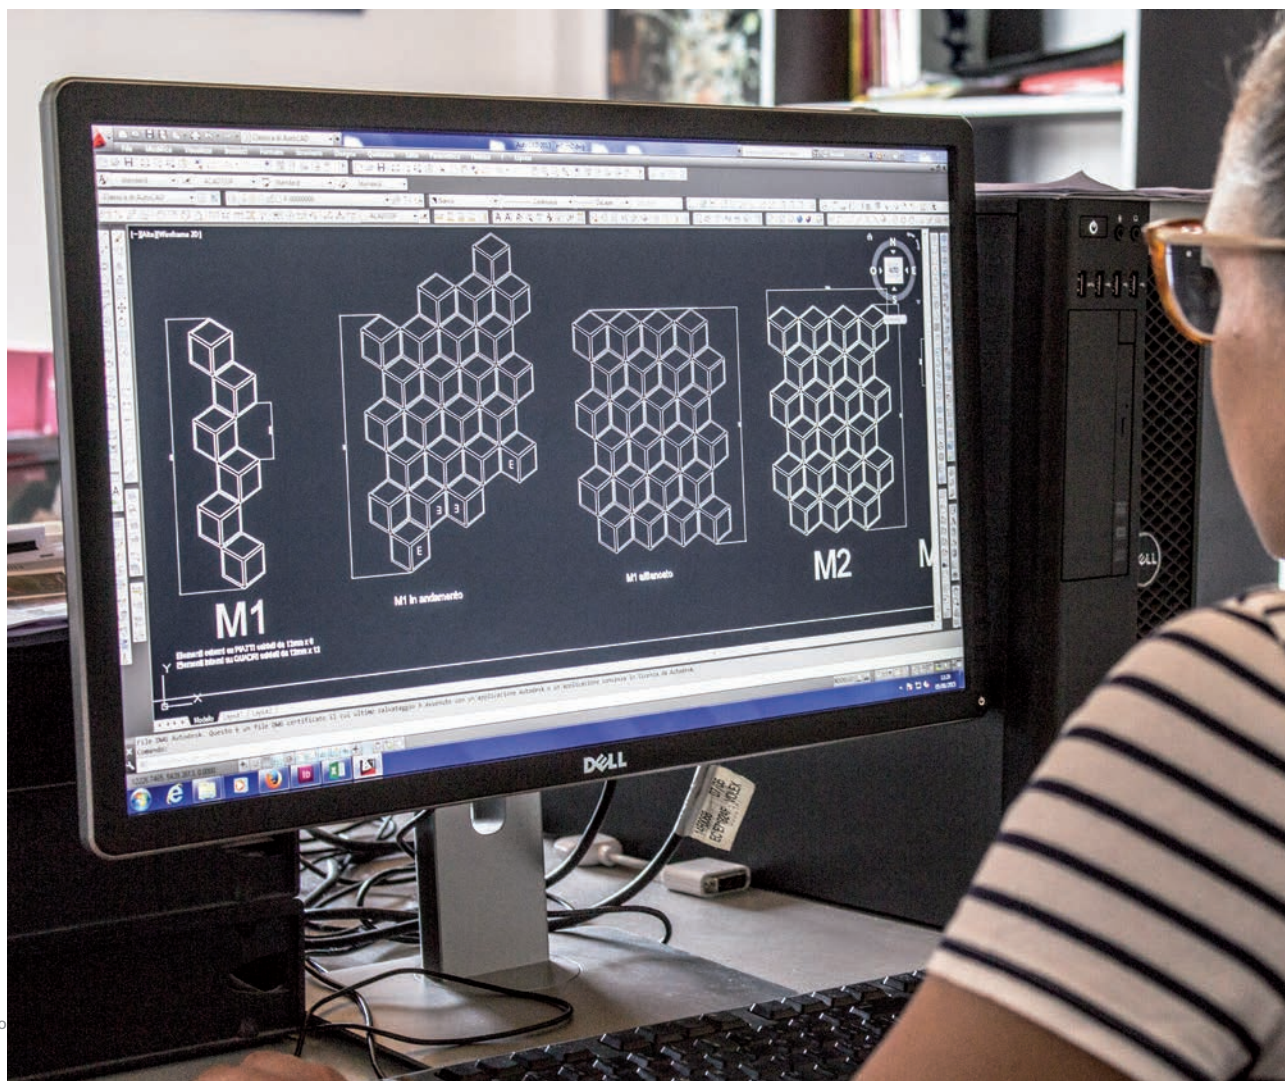

SUPPORTO TECNICO

The company supports clients and users with training sessions held by qualified experts. A team of architects, engineers and qualified experts is at the disposal of the customers to provide them with products information and explanations on their uses and applications.

L'azienda supporta i clienti e gli utenti con sessioni di formazione tenute da esperti qualificati. Un team di architetti, ingegneri ed esperti qualificati è a disposizione dei clienti per fornire loro informazioni sui prodotti e spiegazioni sui loro utilizzi e sulle applicazioni.

Il catalogo, comprese tutte le sue parti, è tutelato dalla legge sui diritti d'autore. Sono vietate e sanzionate (se non espressamente autorizzate) la riproduzione in ogni modo e forma (comprese le fotocopie, la scansione, la memorizzazione elettronica) e la comunicazione (ivi inclusi a titolo esemplificativo ma non esaustivo: la distribuzione, l'adattamento, la traduzione e la rielaborazione, anche a mezzo di canali digitali interattivi e con qualsiasi modalità attualmente nota od in futuro sviluppata)

The catalogue, including all its parts, is under copyright law. Any reproduction in any way and form (including photocopies, scans, electronic storages) and communication (including for example: the distribution, the adjustment, the translation and the revision, also through digital interactive channels and any other mode currently known or developed in future) is forbidden and sanctioned (if not clearly authorised).

Ci riserviamo il diritto di apportare variazioni tecniche di fabbricazione e di dimensioni ai prodotti. I prodotti originali possono differire leggermente dalle rappresentazioni fotografiche. A questo proposito non sarà accettato nessun reclamo.

We reserve the right to make technical changes of the production process and of the article's dimensions.

The original item can slightly differ from its picture. Hence no claims can be accepted in this regard.

IAM Design declina ogni responsabilità giuridica non legalmente prevista per eventuali errori di stampa.

IAM Design disclaims any legal liability not legally foreseen for printing mistakes

La somma massima prevista per i risarcimenti è rappresentata dal valore della merce integra.

The max reimbursement amount foreseen as claim for damages is to be referred to the value of intact goods

Si prega di osservare le direttive legali applicabili nelle varie regioni/nei vari paesi.

You are kindly requested to observe the directives applied in the different areas/countries.

I prezzi indicati sono netti per unità, imballaggio incluso. Tutti i prezzi sono IVA esclusa.

The prices are net per unit, packaging included. All prices are exempt of VAT.

Per ogni articolo è prevista una confezione minima indicata a listino. Eventuali ordini per quantità che differiscono dalla confezione minima o a multipli di essa, potranno essere automaticamente adeguati dall'azienda senza previa autorizzazione.

For each item a minimum packaging unit is foreseen, as indicated in the price-list. In case of orders with different quantities than those of the minimum packaging or multiple of it, the company can adjust them automatically without prior authorisation.
